

The Eastern Iowa Dxer

**The official Newsletter Of the
Eastern Iowa DX Association**

An affiliated club of the American Radio Relay League

April, 1997

Club Officers:

President: Terry Cellman WØAWL
Vice President: Wade Walstrom WØEJ
Secretary/Treasurer: Frank Apple WØGWK
Repeater Committee: Al Groff KØVM
Joe Finkstein WØMJN

Membership Committee:

Jim Spencer WØSR
Dale Repp WØIZ

Repeater:

WØNX/R 144.59/145.19
WB8ZRL: 147.51,
144.91, 223.40,
CRNETROM

MEETING NOTICE:

The next meeting of the Eastern Iowa DX Association will be Friday, May 9, 1997, in room 219C of Linn Hall on the Kirkwood Community College campus. Doors open at 7:00 PM with the meeting starting at 7:30 PM.

The program will feature Lew Gordon, K4VX, ARRL Midwest Director, who will give a presentation on the 1996 WRTC. Recall that Lew was the head judge of this world class event last summer. Lew has a video tape covering the contest and is sure to have lots of stories to tell about his experiences. This is a meeting you will not want to miss!

Kirkwood Community College located in Cedar Rapids south of US 30 and east of I380. Follow the highway signs. Also, monitor 144.59/145.19 for more detailed directions if needed.

Spring may finally be here! At least the spring EIDXa meeting is coming up. Note that this meeting is the Friday before Dayton so there is no excuse to miss out on what promises to be an excellent program.

This newsletter would be a bit lean were it not for Dennis, N7CKD, who provided his Topband Frequency List for inclusion in this issue. This is an especially useful tool for chasing DX on the Topband since it shows the sub-bands for each DXCC country. This is normally a copyrighted document and Dennis usually sells this list for a nominal fee. He has allowed us to include it in the newsletter for use by our members. In other words, it is copied here by permission! Thanks, Dennis!

Also included here are the minutes of the last EIDXa meeting. For those of you who have not paid your 1996-1997 dues yet, this will be your last newsletter! Be sure to see Frank, WØGWK, to get paid up!

I am scrambling to finish preparation of this issue of the newsletter and was told to be in Florida the rest of this week (4-21)! Tom, WB8ZRL, has graciously agreed to put the wraps on this issue and get it distributed. My thanks to Tom!

I am sad to report that another of our members, Jack Muckler, NB0H, recently became a silent key after a period of declining health. I will remember Jack for the sparkle in his eye, his smile, and his warm heart. Jack liked to work DX and was always building or modifying something. He will be missed. 73, Jack!

Wade W0EJ

Minutes of the January 17, 1997 Meeting

The Winter meeting of the EIDXAs was held in Cedar Hall on the Kirkwood Campus. The meeting had been originally scheduled for 10 Jan. 1997 but was delayed due to the cold weather. This meeting was a joint meeting of the EIDXAs and the Iowa City Amateur Radio Club. Other local radio clubs were invited to hear our guest speaker Joel Dryer, N0GHT. Mr. Dryer's talk expanded on his Oct. 1996 QST article on restrictive covenants to also include ordinances. His excellent talk proceeded the EIDXAs business meeting.

The meeting began with the minutes being approved as published.

Al, K0VM gave the repeater report stating that the repeater had "cold feet". It would stop working when the temperature got very cold.

Tom, WB8ZRL said that the DX cluster was working well.

Bruce, WA3AFS mentioned that the Cedar Valley Amateur Radio Club was putting on a Midnight Special contest Saturday, 8 Mar 1997 beginning at 11 PM Local.

Not enough shirts have been ordered yet. Terry Cellman, WD0AWL requested that anyone interested in ordering a shirt should contact him.

Jim, W0SR gave the DXAC report. He requested that everybody complete the survey form found in the Oct 1996 QST on page 83 and send it in.

A motion was passed to send a \$100 check to the Heard Island DXpedition.

Dennis Peterson, N7CKD was approved as a new member.

A motion was passed to send a check for \$25 to our speaker as an honorarium.

Rich, WW0Q asked if there was any interest in having a EIDXAs web site. He said he could build one for us in conjunction with the one he was doing for the ICARC which he is working on. His offer was accepted.

Respectfully

Frank Apple, W0GWK
Sec. / Treas.

IS THERE REALLY A NEED FOR A TOWER ORDINANCE?

It was not too long ago that those of us in Linn County were deeply involved in working on the proposed and now enacted tower ordinance. Part of the frustration we felt at the time was that the ordinance was not needed because we knew how to put up a tower. The following two items came across the Internet recently and are certainly reason to reflect on our "experience" with our towers.

"I do a lot of tower work for my two way radio business, and recently picked up a new Low Band customer (31 MHz). He has a 110 foot Rohn 25g tower that has been up for 14 years. It is guyed approximately 20 feet up in 2 long dead trees with cheapo 3/8 eye screws, no turnbuckles, no guy grips or clamps (has unknown type of crimp connectors on guys-looks like large non-insulated butt splices to me), uses 1/8" solid hardware store style guy wire, a large Ash tree grew around one set of guys and every time the wind blows it slaps the three guy wires, 4 of the guys have approximately 12" sag on the total length, the base is 2 feet deep (according to him), and it only has occasional bolts installed in the sections (viewed with binoculars), and to top it all off it's not grounded at all either.

"The customer doesn't understand why the whole thing has to come down and be redone completely, he's perfectly content with what he has!

"Think this would classify as one of those Condor Lift jobs ????

"If I ever tried to jury rig something like this, guaranteed it would fall down the next day.

"PS This tower was put up by a 'professional.'"

Scary, right? How about this one?

"A few weeks ago there was a post (imported from another group) by an obviously inexperienced person who wanted to put up some sort of house bracketed tower.

Shortly after that I ran across an article in Radio World (a broadcasting trade paper) by a Troy Conner of Tower Maintenance Specialists. He had been asked to look this tower over by a small church that thinking of buying it along with a radio station. Here are the some excerpts; unfortunately I'm not able to reproduce several photographs from the original article.

"...a small guyed tower 140 feet tall, with a face width of 12 inches. The structure was stayed by four guy levels, with three cables at each level. A folded AM radiator was installed on the structure.

"Even at a distance, I could see that this tower had a serious problem. The top 20 feet was canted about 10 or 15 degrees out of plumb. Closer examination made the problems of this tower even more evident.

"Starting at the ground, I examined three guy anchors. While the connections were in fair shape, the cable tensions were horribly low. At the base of the tower, I was in for my next surprise. Normally, a tower is firmly bolted to the concrete foundation pier. In this case, the tapered base section actually stood on the top of the anchor bolts. Nothing prevented the tower from merely falling off the pier.

"The concrete foundation pier had been poured inside an 18-inch galvanized culvert pipe, which extended about 4 feet above grade. In addition to being too small and protruding way too far above ground, the pier appeared to have shifted slightly downhill, causing a distinct lean.

"Examining the first splice, I noted that the bolt holes between sections did not appear to line up. As a result, the original crew had used smaller diameter bolts. Later, the manufacturer of these sections told me that their towers must be assembled in sequence, although the sections appear identical. Not only

were bolts used in only about half of the holes; the bolts themselves were too short, often only catching part of the nut.

"At 100 feet, I decided to climb no further. At this point, the tower was held together tenuously by one bolt on one leg, two U-bolts haphazardly around the second leg, and a turnbuckle on the third. Apparently, the crew, having run out of sections from one manufacturer, simply created this fine interface in order to use some handy sections from another company.

"The piece de resistance was the old rusted come-along with two of the four cable strands broken. In lieu of bolts, this splendid arrangement had been contrived to connect the seventh and eighth sections. The top 40 feet of tower did not appear to have any splice bolts; only gravity and friction held the sleeve-type connections between sections."

"I hope your towers don't fit the above description!"

Me, too! I cannot imagine even trying to climb one of these towers!

There is a line from an old Peanuts cartoon where Charlie Brown is lamenting after another baseball game loss, "How can we lose when we are so sincere?" In the case of amateur radio, towers, and local governments sincerity is measured by actions. I know it may be hard to swallow, but after reading these horror stories, there may be some justification for concern about towers on the part of local governments.

A word for the wise W0EJ

NB0BH

Jack Muckler Silent Key

Jack became a silent key on April 17 following a long illness. Jack was born in 1924, served in the Navy during WW II, and retired from Collins after 38 years. Jack was an EIDXA member for 13 years and had served as secretary/treasurer.

Jack was an avid experimenter. He was much more at home at his work bench than he was at the operating position. He designed and built several keys on his lathe. He nearly completed a 4 x 811 amplifier which was never quite good enough (to his standards) to put online. He loved to homebrew his antennas. Numerous wire antennas have hung from his tower over the years. He was prouder of his homemade 220 packet yagi than he was of his 3Y0PI card.

Jack did earn a spot on the DXCC listing that was well up the ladder. He chased DX on SSB, CW and RTTY. And he worked much of what he chased. His call will be missed in the HF pileups, as will it on the repeater.

RIP Jack
