Membership Committee:	Jim Spencer,	WØSR		
	Tom Vavra,	WB8ZRL		

From the President

By Rick NØYY

Well fall is upon us and we can look forward to another season of chasing DX and, for those so included, to get involved in the contest season. Summer was here and is now gone so I hope that all of you got a chance to finish those antenna projects and to start working on the final touches of your stations to be ready for the opportunities that present themselves. The low bands promise to be interesting this year!

I had fun sponsoring the summer picnic/meeting this past August. Terry, WØAWL and Shanna did another outstanding job of preparing the brats and fixing's. Glen, KØJGH, took a few minutes to bring everyone up to speed on a move to reinvigorate Navassa with petitions to the Fish and Wildlife Service. It would be nice to see it reactivated.

This meeting also marks our annual election of officers. I would really like to see someone take the reins of our club

and provide the leadership necessary to move forward. From a personal perspective, I don't think I can continue to lead the club in the way I have in the past. My employer keeps challenging me to find different ways to be on the road to support their initiatives. As everywhere, recent reorganizations have put more focus on some of my specialties and I find that I am challenged more and more.

This is your club. It needs leadership to move forward. There are many of you that have the skills and time (and hopefully the interest) to take the helm and move us forward. I'm concerned that I cannot do the job as well as in the past few years. I've had my turn in the arena and now it is time to pass the gavel. Think about it... If you have some interest please contact either WØSR, WB8ZRL, NRØX, or me.

Enough said...

Speaking of involvement – I plan on being fully engaged in this year's ARRL Sweepstakes contest in November, especially the CW weekend. As a club

we should try to get on the air and support those members that are in the competition. Every contact counts. It also helps to improve the skills necessary to get in the pileups and work that elusive new country. Technology has improved, but everyone's skills need to improve too! It's amazing what you learn about yourself and your station when you push it a bit during a contest or some other event. Get in there and play a while. With all of the classes it may be fun to just see how well you do against your own goals!

That's about it for this newsletter. I look forward to seeing everyone on October 8th.

Editor's Corner

By Tom KØYA

Well, the first thing I need to do is to apologize for getting the newsletter out so late. Too many irons in the fire right now including a totally disrupted QTH as we are remodeling which led to inability to get to the computer for a while.

The local BPL Steering Committee has continued efforts beyond the local Alliant trial. This has included assistance to other organizations and an effort through our Congressman in the 2nd District, the Honorable James Leach, to get some answers and real action from the FCC that will ensure they make the right decision with respect to BPL. Right now we expect the FCC to issue their ruling on the 14th of October. From what we have seen it won't be what we would like but it will be another step on the journey. We will continue our dialogue with the FCC through Congressman Leach and through whatever other paths that are available to ensure we do what we can to protect Amateur Radio.

This next meeting, as our President noted is a very important meeting for the club as it is elections night. Both of us are hoping that there are others interested in helping us keep this an active, vibrant club that is recognized throughout Amateur Radio for its contributions to DX. I'm looking forward to all those who are interested in helping us bring a vibrant program to the club over the next year.

I apologize again for the late and abbreviated newsletter! Hopefully by the next one we will be a bit less disrupted here and I'll be able to devote more time on the newsletter.

See you Friday!

DX WWII Style

By Tom K0YA

Lawrence Robinson, KC0ODK, Project Manager for the B29 Project at The History Center received this note recently from Clyde Hussey, one of the few living B29 Radio Operators from WWII!

"Lawrence, I was going thru some old Air Corps papers and found the attached QSL. It confirms a QSO made with the ART-13 I had set up on the flight line at Northwest Field on Guam in 1945. I think it was on 20 meters. The ART-13 was loaded into a 20 meter phased rhombic right out of the ARRL handbook and the receiver was a BC-348. This is the setup I told you about but I had forgotten the QSL card existed. As you can see, I used W5GCV (Guam Clyde Victor) as my quite illegal call sign on that day. Clyde"

W L I D - P K

 Radio - W5GCV - GUAM.
 UR RST QSA5-R7 NR ON BIAK
 WKB Dec 18th 1945.
 Thanks a lot for the sheets and
 QSO's Clyde. I hope we can have
 more when the army see's fit.
 sorry I have to QRT for present.
 Thanks again. es 736
 Bill
